

INDEX

COPEIA 1985, Nos. 1-4

NEW NAMES

Abronia kalaina 135-141
Atelopos peruensis 910-917
Bajacalifornia arcylepis 345-356
Barbulifer mexicanus 333-339
Breviraja claramaculata 1035-1052
Breviraja nigriventralis 1035-1052
Breviraja schroederi 1035-1052
Cetopsorhamdia phantasia 339-344
Cyrtocara macrocleithrum 591-596
Eptatretus mendozai 865-869

Etmopterus carteri 584-591
Etmopterus perryi 584-591
Gambusia yucatana australis 368, 373-378
Liolaemus curis 556-559
Liophis vanzolinii 565-573
Litoria piperrata 145-149
Nansenia problematica 141-145
Notropis smelsoni 126-134
Rana okaloosae 379-383

NEW AND ESTABLISHED NAMES

Abronia 135-141
aurita 135
bogerti 136-140
chiszari 136-140
deppii 135, 138-140
fuscolabialis 135-136
graminea 136, 138-140
kalaina 135-141
lythrochila 135
matudai 135
mitchelli 135-140
mixteca 135, 138-140
montecristoi 135
oaxacae 135, 137-140
ochoterenai 135
reidi 136-140
salvadorensis 135
taeniata 136, 139-141
vasconcelosii 135
Acalytophis peronii 205
Acanthophis antarcticus 257-259
Acanthuridae
Acanthurus
bahianus 870
chirurgus 879
coeruleus 875-880
hepatus 48
Acestrorhynchus 794
microlepis 794-796
Acheta domestica 925
Acosmanura 180
Acrantophis 1070
Acris 299
gryllus 383
spp. 639
Acrochordidae 1070
Acrochordus 1070
granulatus 957
javanicus 679, 682-685, 690
Agama sp. 93
Agamidae 91, 93, 96-98, 241, 560
Agkistrodon contortrix 649, 959

Agrammus agrammus 972
Aipysurus 1070
eydouxii 205
laevis 1067
Albula 346
Alepocephalidae 345
Alestes nurse 551
Alligator mississippiensis 280, 695, 720, 767
Allodotichthys hubbsi 505
Allopleuron 766
hofmanni 764
Alopias superciliosus 83-84
Alopiidae 228, 230
Alopoglossus 560-562
Alosa
aestivalis 541, 548
chrysocloris 541, 548-549
fallax 541, 548-550, 552
mediocris 541, 548, 551
pseudoharengus 541, 548-550, 552
sapidissima 541, 548-549, 551
Alosinae 541
Alsodes 175-181
barrioi 175, 177, 180
montanus 177-180
monticola 175, 177-180
nodosus 175, 177-180
pehuenche 180
tumultuosus 175-180
Amapasauros 561-562
Ambystoma 87, 247-251, 256, 309, 316-317, 322, 415, 463-465, 479, 535-539, 631-632, 635-636, 926-927, 1029, 1082
jeffersonianum 89, 309, 416, 478, 487
laterale 309-316, 318-319, 322
laterale × *Ambystoma texanum* 318
laterale-texanum 309-324
laterale/tremblayi 313-314, 316
maculatum 86, 89, 247-248, 312, 416, 487, 535-539, 631-637
opacum 86-91, 394, 487, 631-637

- platineum* 309, 311, 317-318
talpoideum 86-91, 477-489, 635-636
texanum 89, 309-319, 322, 462, 464, 487, 1081
tigrinum 86-91, 254-255, 311-312, 316, 394, 487, 500-501, 535-539, 631, 636, 643, 926-932
tigrinum mavortium 928
tigrinum nebulosum 928
tremblayi 309, 311, 313, 316-317
Ambystomatidae 247, 394, 926
Ameiva 560-561, 563
Amia calva 550
Ammocrypta 62
vivax 61-62
Amphibia 282, 394, 1080
Amphiesma vivakari 499
Amphignathodontinae 299
Amphisbaena
alba 981
caeca 981
Amphisbaenidae 560
Amphiuma means 265, 643
Amphiumidae 265
Anablepidae 961
Anableps dowi 961, 964
Anadia 561-562, 564
bogotensis 563
Anchoa
compressa 541
mitschilli 541, 548-553
panamensis 541, 550
walkeri 541, 550
Aneides 5
Anemonia sulcata 737
Anguidae 6, 94, 96, 135, 560
Anguilla
anguilla 206
japonica 517
vulgaria 206
Aniliidae 1070
Anniella 560, 981
nigra 94, 96
pulchra 94, 981-986
pulchra pulchra 981
Anniellidae 94, 96
Anolis 5-7, 244, 282, 707, 905-910, 933
aeneus 1080
bonairensis 93
brevirostris 906
carolinensis 91-93, 182, 193, 259-262, 412, 501, 908
cooki 906
crystalinus 193, 282, 906
cybotes 193, 905-910
distichus 193
equestris 193
erythropus 910, 912
gadovi 282
garmani 193
lemurinus 282
limifrons 260
lineatopus 99
marcanoi 905-910
nebuloides 282
omilemanus 282
polylepis 282
ricordii 908
sagrei 182-194, 409-414
sagrei ordinatus 183
sagrei sagrei 183
sericeus 282
uniformis 282
Anomalepididae 1069
Anoptichthys jordani 1005
Anotheca 299
spinosa 299
Anotosaura 561-562
Antechinus swainsonii 468-471
Anura 107, 145, 175, 423, 625, 910
Apeltes quadracus 209-213
Aphyocharax erythrurus 795-796
Apistogramma
borelli 233-234
caucatooides 233-234
Aplocheilidae 505
Arachnida 902
Araneida 1079
Archelon 763-766
ischyros 752, 754, 762, 764, 768
Argentina 346
Arizona 1070
Artemia salina 918
Arthropoda 902
Arthrosaura 561-562
Aruma 333-334
Ascaphidae 299
Ascaphus 299
truei 462
Asparagopsis sp. 737
Aspidites 1070
Asquamiceps 346-347
Astyanax 161, 1058
bimaculatus 795-796
fasciatus 1004-1011, 1058
fasciatus mexicanus 1005
Atelopus 14, 910-917
arthuri 911-912
bomolochos 910, 912, 915-916
halihelos 911-912
ignescens 910, 912-916
ignescens exigua 912
nepiozomus 911-912
pachydermus 912
peruensis 910-917
pulcher 910, 912
rugulosus 910, 912
seminiferus 910-912
spumarius 910, 912
tricolor 910, 912
willmani 912
Atherinidae 21
Aulonocara sp. 595
Aurelia sp. 737

- Auxis* 231
thazard 231-232
- Baccharis* sp. 916
- Bachia* 560-563
scolecoides 562
- Bajacalifornia* 345-356
arcylepis 345-356
burragei 346-350, 353-355
calcarata 345-347, 349-352, 354
drakei 345, 351-352
erimoensis 345, 351, 353-354
megaloops 345, 347-354
sp. 1 348
sp. 2 347-349, 354
- Balanus trigonus* 453
- Barathrodemus manatinus* 69-73
- Barbulifer* 333-339
antennatus 333, 335, 338
ceuthoecus 333-336, 338
mexicanus 333-338
pantherinus 333-337
papillosus 334
- Barisia* 140
viridiflava 94, 96
- Basiliscus vittatus* 93
- Batagurinae* 713, 785
- Bathylagidae* 141-142
- Bathymacrops macrolepis* 142
- Bathytrocles*
calcaratus 350
drakei 351-352
- Batrachoidiformes* 870
- Batrachoseps* 5
- Batrachyla* 175, 180-181
leptopus 176, 179
taeniata 179
- Belonesox belizanus* 1055
- Bergiaria* 359
- Bitis arietans* 649
- Blenniidae* 39
- Boa* 1070
- Bodianus rufus* 878
- Boidae* 1070
- Boiga* 1070
irregularis 1069

bartholomaei 875, 877-878
ignobilis 798
melampygus 798

- Carcharhinus*
albinmarginatus 83
amblyrhynchus 798
galapagensis 83
leucas 80, 83-84
melanopterus 798
plumbeus 83-84
Caretta 453, 708, 723, 740, 765-766, 772-774
caretta 73-79, 449-456, 671-679, 681-684, 687-690, 694-695, 699, 711-712, 718, 726-727, 729, 732, 738-739, 752, 754, 756-759, 761, 766-768, 775, 786-788, 1083-1085
Carettochelyidae 754
Carettochelys 754
insculpta 752, 754-756, 768, 786
Carpiodes 834, 838
carpio 837-838, 846
cyprinus 837-838, 840, 846
velifer 837-838, 840, 846
Caspialosa pontica 541, 548-551
Catostomidae 833
Catostominae 833-834, 840, 842
Catostomini 833-834
Catostomus 833-834, 840, 842
catostomus 837-838, 846
commersoni 613-618, 836-838, 840, 846
discobolus 837-838, 846
latipinnis 837-838, 846
Caudata 247, 264-265
Caudiverbera 175-181
caudiverbera 175-180
Caulerpa 737, 744
sp. 737
Celastrus scandens 303
Cemophora 1070
Centropyge 235
Ceratophrys ornata 571
Cercis canadensis 303
Cercosaura 561-562
Certionotus gunnellus 206
Cetopsorhambia 339-344
molinae 343
nasus 341-343
phantasia 339-344
picklei 342
Cetorhinidae 228, 230
Cetorhinus 228-230
maximus 220-222
Chaetodon 235-236
ocellatus 236-237
ocellatus × *Chaetodon striatus* 235-238
striatus 235-237
Chamaecyparis thyoides 383
Chamaeleo 95, 244, 560
jacksoni 91, 93-94
Chamaeleonidae 91, 93-94, 96, 98
Chamaeleontidae 241, 560
Chanos chanos 551, 890-898
Chapalichthys encaustus 112-118
Characidae 794, 1004-1005
Characiformes 997-998
Charina 1070
Chasmistes 837
Cheirocerus 356-367
abuelo 356-357, 360-363, 365-367
eques 356-367
goeldii 356, 358-367
leptus 356, 359, 360, 363, 365-366
Cheirodon 1059
affinis 1058-1060
arnoldi 1058-1060
pulcher 795
terrabrae 1058
Chelidae 445, 754, 784

SUBJECT INDEX

COPEIA, 1985, No. 1-4

- ACCLIMATION**, *Gambusia affinis* (to temp.) 456-461.
- ACTIVITY**, *Spalerosophis*, *Pythonodipsas* (pupil shape & diel activity) 266-268.
- AGE**, *Embiotoca* (*jacksoni*, *lateralis*) (age-related diet patterns) 986-994; *Ambystoma texanum*, *Hynobius nebulosus*, *Rana* (*aurora*, *catesbeiana*, *pretiosa*, *sylvatica*), *Polypedates leucomystax*, *Triturus vulgaris* (age-specific mortality in larvae) 1080-1083.
- ANATOMY**, sea turtles (digestive tract) 736-751.
- ASYMMETRY**, *Gasterosteus aculeatus* (in reduction of pelvic complex) 437-444; *Gasterosteus aculeatus* (of lat. plate no.) 619-624.
- AUTOTOMY**, *Phyllodactylus marmoratus* (economy of autotomy) 468-472; *Sphenomorphus quoyii* (effect on exercise capacity) 1074-1077.
- BEHAVIOR**, *Hyla microcephala* (intra- & interspecific vocal behav.) 27-38; *Ptychocheilus lucius* (homings) 213-215; *Oxybelis aeneus* (cryptic movements) 242-245; *Xenopus laevis* (analysis of swimming behav.) 251-254; *Spalerosophis*, *Pythonodipsas* (vipelike behav.) 266-268; *Lampropeltis*, *Micrurus*, *Erythrolamprus* (adaptive value in predation on bird nests) 384-387; *Anolis sagrei* (avoidance learning) 409-414; *Hynobius nebulosus* (cannibalism among larvae) 472-476; *Bufo americanus* (mating call phonotaxis in females) 490-492; *Crotalus viridis viridis* (mouth gaping & head shaking) 496-497; *Eumeces okadae* (effect of brooding on egg mortality) 497-500; *Gymnothorax herrei* (spawning) 518-520; *Bufo boreas* (effect of salinity on feeding behav.) 645-648; sea turtles (behav. thermal regulation) 694-702; *Eumeces fasciatus* (egg-brooding behav.) 777-779; *Caretta caretta* (use of limb scales in food handling) 786-788; *Acanthurus coeruleus*, *Caranx bartholomaei*, *Sparisoma rubripinne* (role of cleaners in wound healing) 875-880; *Anolis* (*cybotes*, *marcanoi*) (inter- & intraspecific aggressive behav.) 905-910; *Salmo trutta* (prey switching) 918-926; *Urosaurus ornatus* (aggression differences between color morphs) 933-940; *Oxylebius pictus* (social behav. & color changes) 966-975; *Astyanax fasciatus* (change in phototactic responses of surface & cave popn.) 1004-1011; *Ictalurus nebulosus* (individual recognition) 1060-1062; *Aipysurus laevis*, *Boiga irregularis*, *Cacophis squamulosus*, *Demansia psammophis*, *Denisonia punctata*, *Fordonia leucobalia*, *Myron richardsoni*, *Notechis ater*, *Pseudonaja affinis*, *guttata*, *ingrami*, *modesta*, *nuchalis*, *textilis*, *Simose-laps bertholdi*, *Stegonotus cucullatus* (prey constriction) 1067-1071.
- BLOOD**, *Caretta caretta* (properties during dives) 671-679; *Acrochordus javanicus*, *Caretta caretta*, *Chelonia mydas*, *Dermochelys coriacea*, *Lepidochelys kempi* (hemoglobin struct. & func.) 679-693; *Crotaphytus collaris* (seasonal hematol. var.) 782-784.
- BRAIN**, *Anolis sagrei* (basal forebrain & neurochem. correlates of learning) 409-414; *Caretta caretta* (properties during dives) 671-679.
- CALLS**, *Hyla* (*eberrata*, *microcephala*, *phlebodes*) (intra- & interspecific vocal behav.) 27-38; *Bufo americanus* (mating call phonotaxis in females) 490-492.
- CANNIBALISM**, *Hynobius nebulosus* (among larvae) 472-476.
- CHEMORECEPTION**, (in tastes buds on tongue & oral epithelium of lizards) 91-101; *Sceloporus jarrovi* (olfaction & vomeronasal) 239-242.
- CHROMOSOMES**, *Oncorhynchus tshawytscha* (Q band chromosomal polymorphism) 273-278; *Platemys* (*macrocephala*, *pallidipectoris*, *platycephala*, *radiolata*, *spixii*) (karyotypic variat.) 445-449; *Nothobranchius guentheri* (multiple sex chromosome system) 503-508; *Gambusia* (*luma*, *rhizophorae*, *serrulata*, *xanthosoma*) (karyotypes) 1053-1056; *Rana* (*a. aurora*, *aurora draytoni*) (differ. in centromeric heterochromatin) 1071-1074.
- CLEANING**, role of cleaning stations in wound healing 875-880.
- CLIMATE**, *Ambystoma talpoideum* (climatic factors influencing migration) 477-489.
- COLORATION**, *Erythrolamprus*, *Lampropeltis*, *Micrurus* (adaptive value of bright ring pattern in males) 384-387; *Anolis* (*cybotes*, *marcanoi*) (dewlap color & species recognition) 905-910; *Urosaurus ornatus* (aggression differences between color morphs) 933-940; *Oxylebius pictus* (social behav. & color changes) 966-975; *Breviraja* (*claramaculata* n. sp., *colesi*, *nigriventralis* n. sp., *schroederi* n. sp., *spinosa*) (color morphs recognized as distinct species) 1035-1052.
- COMPETITION**, (in resource partitioning in salamanders & reptiles) 1-21.
- CYTOLOGY**, *Sauromalus obesus* (nasal gland) 403-409; *Sciaenops ocellatus* (gill arch epithelial & chloride cells) 515-518.
- DENTITION**, *Tupinambis* (*nigropunctatus*, *teguixen*) (ontogen. changes in dentition) 245-247.
- DEVELOPMENT**, *Spalerosophis cliffordi* (embryonic develop. of Duvernoy's gland) 101-106; *Tupinambis* (*teguixen*, *nigropunctatus*) (ontogen. changes in dentition) 245-247; *Eleutherodactylus* (*antillensis*, *coqui*, *portoricensis*) (direct develop. in; use in staging table) 423-436; *Ambystoma texanum*, *Bufo americanus*, *Pseudacris triseriata*, *Rana sphenoc-*

- phala* (ontogen. shifts in final temp. preferenda) 462-467; *Gasterosteus aculeatus* (develop. osteol. of pelvic complex) 789-792; *Carpiodes* (*carpo*, *cyprinus*, *velifer*), *Catostomus* (*catostomus*, *commersoni*, *discobolus*, *latipinnis*), *Cycleptus elongatus*, *Erimyzon oblongus*, *Hyptelium nigricans*, *Ichiobus* (*bubalus*, *cyprinellus*, *niger*), *Minytrema melanops*, *Moxostoma* (*erythrurum*, *macrolepidotum*), *Xyrauchen texanus* (use of larval charc. to examine phylogeny) 833-846; *Astyanax fasciatus* (ontogen. change in phototaxis) 1004-1011; *Taricha torosa* (effect of egg size on larval develop.) 1028-1035.
- DEWLAP, *Anolis* (*cybotes*, *marcanoi*) (role of dewlap color in species recognition) 905-910.
- DISPERSAL (see Movement)
- DISTRIBUTION, *Sibon* (*f. fischeri*, *fischeri* *kidderi*, *carri*) 164-174; *Noturus lachneri* 216-220; *Cetorhinus maximus*, *Prionace glauca*, *Sphyrna* spp. (from sightings off NE U.S.) 220-223; *Caretta caretta*, *Dermochelys coriacea*, *Lepidochelys kempi* (distr. in Chesapeake Bay) 449-456.
- DUVERNOY'S GLAND, *Spalerosophis cliffordi* (embryonic develop. of) 101-106.
- ECOLOGY, (resource partitioning in salamanders & reptiles) 1-21; *Rana* (*pipiens*, *sylvatica*) (physiol. effects of low environ. pH) 415-423; sea turtles (nutritional ecol.) 736-751; *Gambusia marshi* 898-905.
- EGGS, *Ophioblennius atlanticus macclurei* 39-49; (water & heat exchange in reptile eggs) 703-711; *Eumeces fasciatus* (egg-brooding) 777-779; *Sternotherus odoratus* (egg/body size relat.) 941-949; *Taricha torosa* (effect of egg size on larval develop.) 1028-1035.
- ELECTROPHORESIS, *Pelobates* (*cultripes*, *varaldii*) 107-112; *Chapalichthys encaustus*, *Goodea atripinnis* (survey of enzyme polymorphism) 112-118; (as a tool in studies of anuran evol.) 292-309; *Scaphiopus* (*bombifrons*, *multiplicatus*) (electroph. used to detect hybridization) 324-332; *Oryzias* (*celebensis*, *javanicus*, *latipes*, *luzonensis*, *melastigma*) (compar. of proteins) 521-522; *Gambusia affinis* (differences in dispersing & nondispersing fish) 597-612.
- EMBRYOLOGY, *Eleutherodactylus* (*antillensis*, *coqui*, *portoricensis*) (use in developing a staging table) 423-436.
- EMERGENCE, *Chelonia mydas* (non-nesting emergence in Australia) 262-264.
- ENDOCRINOLOGY, *Bufo americanus* (induction of mating call phonotaxis by intracerebroventricular prostaglandin) 490-492; sea turtles (comp. endocrinol. of) 723-735; *Eumeces fasciatus* (egg-brooding not influenced by ovarian steroids) 777-779.
- EYE, *Pythonodipsas*, *Spalerosophis* (pupil shape & diel activity) 266-268.
- EVOLUTION, (creatine kinase var.: use in evol. & syst. studies of amphib. & rept.) 279-284; (electrophoresis & microcomplement fixation as tools in studies of anuran evol.) 292-309.
- EXTINCTION, dinosaurs (role of temp. depend. sex determination on) 711-722.
- FEEDING, *Menidia menidia* 21-26; *Ambystoma maculatum* (kinematics of midwater prey capture) 247-251; *Ambystoma tigrinum*, *Desmognathus* (*fuscus*, *monticola*, *ochrophaeus*, *quadramaculatus*), *Gyrinocheilus porphyriticus*, *Pseudotriton ruber* (role of atlanto-mandibular ligaments in feeding) 254-257; *Bufo boreas* (effects of salinity on feeding behav.) 645-648; *Chelonia mydas* (nutritional ecol.) 736-751; *Caretta caretta* (use of limb scales in food handling) 786-788; *Salmo trutta* (prey switching) 918-926; *Brevoortia tyrannus* (branchial basket struct. associated with feeding) 1018-1027.
- FOOD, (size & type in resource partitioning in salamanders & reptiles) 1-21; *Noturus lachneri* 216-220; sea turtles (nutritional ecol.) 736-751; *Acestrorhynchus microlepis* (diet in low llanos) 794-796; *Gambusia marshi* 898-905; *Embiotoca* (*jacksoni*, *lateralis*) (age-related diet patterns) 986-994; *Sceloporus undulatus garmani* (max. prey size) 1077-1080.
- GENETICS, *Gambusia affinis*, *Lepomis macrochirus*, *Micropterus salmoides* (genetic heterogen. rel. to body size) 118-125; *Oncorhynchus tshawytscha* (Q band to chromosomal polymorphism) 273-278; (genetic var. of creatine kinases of amphib. & rept.) 279-284; *Salmo apache* (genetic contamination with introd. salmonids) 285-292; *Gambusia affinis* (genetic differences in dispersing & nondispersing fish) 597-612; *Scorpaena guttata*, *Sebastes* (*atrovirens*, *caurinus*, *melanostomus*, *mystinus*, *japonicus*) (mitochondrial DNA) 1056-1058.
- GEOGRAPHIC LOCALITIES
- Alabama, *Notropis* (*atrificulus*, *b. bellus*, *bellus* *alegnotus*, *roseipinnis*) 154-163; *Pseudacris* *t. triseriata*, *Rana sphenoccephala* 462-467.
- Alaska, *Gasterosteus aculeatus* 437-444; 619-624.
- Argentina, *Liophis* (*anomalus*, *elegantissimus*, *vanzolini* n. sp.) 565-573.
- Arizona, *Sceloporus jarrovi* 239-242; *Salmo apache* 285-292; *Scaphiopus* (*bombifrons*, *multiplicatus*) 324-332; *Gambusia affinis* 456-461.
- Arkansas, *Etheostoma* (*blennioides*, *caeruleum*, *euzonum*, *juliae*, *punctulatum*, *spectabile*, *stigmaeum*, *zonule*), *Percina* (*caprodes*, *evides*) 56-68; *Notropis snelsoni* n. sp. 126-134; *Noturus lachneri* 216-220.
- Atlantic, *Bajacalifornia* (*arcylepis* n. sp., *calcarata*, *megalops*) 345-356; *Coryphaenoides* (*a. armatus*, *leptolepis*) 1011-1017.
- Australia, *Litoria* (*citropa*, *pearsoniana*, *phylochroa*, *piperata* n. sp. [N.S.W.], *subglandulosa*) 145-149; *Acanthophis antarcticus*, *Notechis* (*curtus*, *scutatus*) 257-259; *Chelonia mydas* 262-264; *Phyllodactylus marmoratus* (So. Austr.) 468-472; *Bufo marinus*

- 625-631; *Emydura signata* 784-786; *Aipysurus laevis*, *Boiga irregularis*, *Cacophis squamulosus*, *Demansia psammophis*, *Denisonia punctata*, *Fordonia leucobalia*, *Myron richardsoni*, *Notechis ater*, *Pseudonaja (affinis, guttata, ingrami, modesta, nuchalis, textilis)*, *Simoselaps bertholdi*, *Stegonotus cucullatus* 1067-1071.
- Barbados, *Ophioblennius atlanticus macclurei* 39-49.
- Belize, *Gambusia yucatana australis* n. subsp. 368-378; *Gambusia (huma, sexradiata)* 1053-1056.
- Bolivia, *Cheirocerus eques* 356-367.
- Brazil, *Cheirocerus (eques, goeldii)* 356-367; *Liophis anomalus* 565-573.
- California, *Bajacalifornia burraigei* 345-356; *Bufo boreas* 645-648; *Gasterosteus aculeatus* 789-793; *Oxybelus pictus* 966-975; *Anniella pulchra* 981-986; *Embiotoca (jacksoni, lateralis)* 986-994; *Taricha torosa* 1028-1035; *Rana (a. aurora, aurora draytoni)* 1071-1074.
- Canada, (Quebec) *Apeltes quadracus*, *Gasterosteus (aculeatus wheatlandi)*, *Pungitius pungitius* 209-213; *Bufo boreas* 645-648; *Gasterosteus aculeatus* 789-792; *Etheostoma (nigrum, olmstedii)* 855-865; *Oxybelus pictus* 966-975; *Anniella pulchra* 981-986; *Embiotoca (jacksoni, lateralis)* 986-994; *Taricha torosa* 1028-1035; *Rana aurora aurora* 1071-1074.
- Cayman Is., *Gambusia xanthosoma* 1053-1056.
- Chile, *Alsodes (barrioi, monticola, nodosus, tumultuosus)*, *Caudiverbera caudiverbera*, *Insuetophrynus acarpius*, *Telmatobius (halli, marmoratus, montanus, pefauri, peruvianus)* 175-181; *Bajacalifornia megalops* 345-356; *Liolaemus curis* n. sp. 556-559.
- China, *Oryzias latipes* 521-522.
- Colombia, *Breviraja nigriventralis* n. sp. 1035-1052.
- Colorado, *Ptychocheilus lucius* 213-215; *Ambystoma tigrinum* 926-932.
- Connecticut, *Menidia menidia* 21-26.
- Dominican Republic, *Anolis (cybotes, marcanoi)* 905-910.

- West Africa, *Bajacalifornia calcarata* 345-356.
- Wisconsin, *Oncorhynchus tshawytscha* 273-278.
- Wyoming, *Crotalus v. viridis* 496-497.
- GILLS, *Sciaenops ocellatus* (gill arch epithelium) 515-518.
- GROWTH, *Menidia menidia* 21-26; *Cryptobranchus algerianensis* (examination of long-term growth predictions by linear regression) 492-496; *Chelonia mydas* (nutrient limitations on growth) 736-751; *Archelon ischyros*, *Caretta caretta*, *Carettochelys insculpta*, *Chelonia mydas*, *Dermochelys coriacea*, *Eretmochelys imbricata*, *Geochelone elephantopus*, *Lepidochelys (kempi, olivacea)*, *Macrochelys temminckii*, *Podocnemis unifilis*, *Rhinocorychelys pulchriceps*, *Stupen-*
- demys geographicus* (skeletal growth) 752-771; *Desmognathus quadramaculatus*, *Leurognathus marmoratus* (growth rates in s. Appalachian stream) 847-854; *Ichthyomyzon greeleyi* (growth of larvae & adults) 881-890; *Typhlonectes compressicaudus* 950-955; *Enhydryna schistosa* (using mark & recapture data in Malaysia) 955-961.
- HABITAT, (dimension in resource partitioning in salamanders & reptiles) 1-21; *Sibon (carri, f. fischeri, fischeri kideri)* 164-174; *Alsodes (barrioi, monticola, nodosus, tumultuosus)*, *Caudiverbera caudiverbera*, *Insuetophrynus acarpicus*, *Telmatobius (halli, marmoratus, montanus, pefauri, peruvianus)* (habitat preferences) 175-181; *Noturus lachneri* 216-220; *Xenopus (gilli, laevis)* (hab. selection in Cape Province) 574-580.
- HISTOLOGY, *Desmognathus ochrophaeus* (cloacal gland & spermatophore) 394-402; *Sauromalus obesus* (nasal gland) 403-409; sea turtles (of digestive tract) 736-751.
- HOMING, (see Migration)
- HYBRIDIZATION, *Chaetodon ocellatus* × *C. striatus* 235-238; *Ambystoma laterale-texanum* (unisexual hybrid) 309-324; *Scaphiopus (bombifrons × multiplicatus)* (introgressive hybrid.) 324-332; *Icthyophis phlegthontis* × *Gila atraria*, *I. phlegthontis* × *Rhinichthys osculus* 509-515; *Xenopus (gilli × laevis)* 574-580.
- IMMUNOLOGY, *Pelobates (cultripes, varaldii)* (albumin) 107-112.
- LATERAL LINE, *Ambystoma (maculatum, tigrinum)* (neuromast topography) 535-539; *Dorosoma cepedianum* (lat. line system) 540-556.
- LARVAE, *Ophioblennius atlanticus macclurei* 39-49; *Alsodes (barrioi, monticola, nodosus, tumultuosus)*, *Caudiverbera caudiverbera*, *Insuetophrynus acarpicus*, *Telmatobius (halli, marmoratus, montanus, pefauri, peruvianus)* (larval morphol.) 175-181; *Ambystoma texanum*, *Bufo americanus*, *Pseudacris triseriata*, *Rana sphenoccephala* (ontogeny of temp. selection in larvae) 462-467; *Hynobius nebulosus* (cannibalism among larvae) 472-476; *Bufo marinus* (effects of photoperiod & starvation on temp. tolerance of larvae) 625-631; *Rana tigrina* (factors affecting metamorphic period & larval period) 653-662; *Carpiodes (carpio, cyprinus, velifer)*, *Catostomus (catostomus, commersoni, discobolus, latipinnis)*, *Cycleptus elongatus*, *Erimyzon oblongus*, *Hypentelium nigricans*, *Ictiobus (bubalus, cyprinellus, niger)*, *Minystroma melanops*, *Moxostoma (erythrurum, macrolepidotum)*, *Xyrauchen texanus* (use of larval charc. to develop phylogeny) 833-846; *Desmognathus quadramaculatus*, *Leurognathus marmoratus* (life history info.) 847-864; *Ichthyomyzon greeleyi* (larval growth, period, metamorphosis and

- changes in body proportions) 881-890; *Ambystoma texanum*, *Hynobius nebulosus*, *Rana* (*aurora*, *caesbeiana*, *pretiosa*, *sylvatica*), *Polypedates leucomystax*, *Triturus vulgaris* (age-specific mortality in larvae) 1080-1083.
- LIFE HISTORY**, *Ophioblennius atlanticus macclurei* 39-49; *Desmognathus quadramaculatus*, *Leurognathus marmoratus* (larval life history info.) 847-854; *Gambusia marshi* 898-905; *Sternotherus odoratus* (life history attributes) 941-949.
- LIGHT**, *Asiyanax fasciatus* (ontogenetic change in phototaxis) 1004-1011; *Taricha torosa* (effect of egg size on larval develop.) 1028-1035.
- LOCOMOTION**, *Elaphe g. guttata*, *Nerodia fasciata pictiventris* (swimming) 195-208; *Sphenomorphus quoyii* (effect of tail autotomy on exercise capacity) 1074-1077.
- METAMORPHOSIS**, *Rana tigrina* (time & energy costs of) 653-662; *Ambystoma tigrinum* (facultative metamorph. in fossil popn.) 926-932; *Taricha torosa* (effect of egg size on metamorph.) 1028-1035.
- METHODS**, (nerve staining of amphib. & rept. using Sudan Black B) 500-502; *Lepidochelys olivacea* (for determining sex of hatchlings) 779-782.
- MIGRATION**, *Ptychocheilus lucius* (homing in Green R. basin) 213-215; *Ambystoma talpoideum* (climatic factors influencing) 477-489; *Ambystoma* (*maculatum*, *opacum*) (migratory orientation & homing) 631-637.
- MORPHOLOGY**, (Morphol. & physiol. constraints in resource partitioning among salamanders & reptiles) 1-21; (tastebuds on tongue & oral epithelium of lizards) 91-101; *Pelobates* (*cultripes*, *varaldii*) (morphol. compar.) 107-112; *Alsodes* (*barrioi*, *monticola*, *nodosus*, *tumultuosus*), *Caudiu-erbera caudiuverba*, *Insuetophrynus acarpicus*, *Telmatobius* (*halli*, *marmoratus*, *montanus*, *pefauri*, *peruvianus*) (larval morphol.) 175-181; *Anolis sagrei* (microevol. adjustments of morphol. in Fla. popn.) 182-194; *Elaphe g. guttata*, *Nerodia fasciata pictiventris* (axial skeleton & musculature) 195-208; *Xenopus laevis* (function of sliding pelvis in swimming) 251-254; *Ambystoma tigrinum*, *Desmognathus* (*fuscus*, *ochrophaeus*, *quadramaculatus*), *Gyrinophilus porphyriticus*, *Pseudotriton ruber* (function of atlanto-mandibular ligaments; *Pythonodipsas*, *Spalerosophis* (viperlike head shape & behav.) 266-268; *Eleutherodactylus coqui* (embryo morphol.) 423-436; *Gasterosteus aculeatus* (pelvic reduction & asymmetry) 437-444; *Sciaenops ocellatus* (gill arch epithelium) 515-518; *Ambystoma* (*maculatum*, *tigrinum*) (neuromast topography) 535-539; *Dorosoma cepedianum* (of lat. line system) 540-556; *Teiidae* (infralingual plicae) 560-565; *Chelonia mydas* (lung structure) 664-671; *Etheostoma* (*nigrum*, *olmstedii*) (morphol. differentiation of) 855-856; *Chanos chanos* (morphol. var. in) 890-898; *Coryphaenoides* (*acrolepis*, *a. armatus*, *armatus variabilis*, *leptolepis*), *Nezumia* (*liolepis*, *steligolepis*) (var. in sagitta morphol. with depth) 1011-1017; *Brevortia tyrannus* (func. morphol. of branchial basket struct.) 1018-1027.
- MORTALITY**, *Caretta caretta*, *Dermochelys coriacea*, *Lepidochelys kempi* (mortality in Chesapeake Bay) 449-456; *Eumeces okadae* (brooding & egg mortality) 497-500; *Ambystoma texanum*, *Hynobius nebulosus*, *Rana* (*aurora*, *caesbeiana*, *pretiosa*, *sylvatica*), *Polypedates leucomystax*, *Triturus vulgaris* (age-specific mortality in larvae) 1080-1083.
- MOVEMENT**, *Oxybelis aeneus* (cryptic movements) 242-245; *Ambystoma maculatum* (kinematics of midwater prey capture) 247-251; *Chelonia mydas* (non-nesting emergence) 262-264; *Gambusia affinis* (genetic differences in dispersing & nondispersing fish) 597-612; *Desmognathus quadramaculatus*, *Leurognathus marmoratus* (larval stream drift, effect on popn. structure) 847-854.
- NASAL GLAND**, *Sauromatus obesus* (histol., cytol.) 403-409.
- NEOTONY**, *Ambystoma tigrinum* (in fossil popn.) 926-932.
- NERVES**, *Ambystoma tigrinum*, *Pseudacris triseriata*, *Rana pipiens*, *Thamnophis sirtalis* (nerve staining of amphibians and reptiles using Sudan Black B) 500-502; *Ambystoma* (*maculatum*, *tigrinum*) (neuromast topography) 535-539; *Dorosoma cepedianum* (lat. line system) 540-556.
- OLFACTION**, *Ictalurus nebulosus* (individual recognition) 1060-1062.
- OSMOREGULATION** (see Physiology)
- OSTEOLOGY**, *Archelon ischyros*, *Caretta caretta*, *Carettochelys insculpta*, *Chelonia mydas*, *Dermochelys coriacea*, *Eretmochelys imbricata*, *Geochelone elephantopus*, *Lepidochelys* (*kempi*, *olivacea*), *Macrolemys temminckii*, *Podocnemis unifilis*, *Rhinocelys pulchriceps*, *Stupendemys geographicus* (skeletal osteology) 752-771; *Gasterosteus aculeatus* (develop. osteol. of pelvic complex) 789-792.
- OTOLITHS**, *Coryphaenoides* (*acrolepis*, *a. armatus*, *armatus variabilis*, *leptolepis*), *Nezumia* (*liolepis*, *steligolepis*) (var. in sagitta morphol. with depth) 1011-1017.
- PALEONTOLOGY**, *Siren* sp. indet. (Miocene n. Nebraska) 264-266; *Ambystoma tigrinum* (Pleistocene, Colorado) 926-932.
- PARASITES**, *Gambusia marshi* 898-905.
- pH**, *Rana sylvatica* (effects of low pH on tadpole ionic regulating mech.) 415-423.
- PHYSIOLOGY**, (physiol. & morphol. constraints in resource partitioning among salamander & reptiles) 1-21; *Apeltes quadracus*, *Gasterosteus* (*aculeatus*, *wheatlandi*), *Pungitius pungitius* (salinity preference during reprod. season) 209-213; *Anolis*

sagrei (basal forebrain & neurochem. mech. in learning) 409-414; *Rana sylvatica* (effects of low pH on tadpole ionic regulat. mech.) 415-423; *Gambusia affinis* (thermal tolerance) 456-461; *Chelonia mydas* (respiration) 664-671; *Caretta caretta* (respir. physiol. of diving) 671-679; *Acrochordus javanicus*, *Caretta caretta*, *Chelonia mydas*, *Dermochelys coriacea*, *Lepidochelys kempi* (hemoglobin struct. & func.) 679-693; sea turtles (thermal regulation) 694-702; reptile eggs (water & heat exchange in) 703-711; sea turtles (role of hormones in physiol. ecol.) 723-735; sea turtles (salt & water regulation in) 771-776; *Pangasius sutchi* (swimbladder for air-breathing) 994-998; *Anniella pulchra* (drinking of soil water) 981-986.

POPULATIONS, *Goodea atripinnis*, *Chapalichthys encostus* (intralacustrine differentiation in L. Chapala) 112-118; *Gambusia* (*y. yucatana*, *yucatana australis* n. subsp.) 368-378; *Gasterosteus aculeatus* (popn. var. in pelvic complex reduction & dorsal spine loss) 437-444; *Caretta caretta*, *Dermochelys coriacea*, *Lepidochelys kempi* (popn. structure in Chesapeake Bay) 449-456; *Gambusia affinis* (demographic differences in dispersing & nondispersing fish) 597-612; *Desmognathus quadramaculatus*, *Leurognathus marmoratus* (popn. structure in a s. Appalachian stream) 847-854; *Ambystoma tigrinum* (facultative metamorph. in high-altitude popn., Pleistocene, Colorado) 926-932; *Enhydra schistosa* (using mark & recapture data in Malaysia) 955-961; *Astyianax fasciatus* (change in phototactic responses of surface & cave popn.) 1004-1011.

PREDATION, (as a factor in resource partitioning among salamanders & reptiles) 1-21; *Notophthalmus viridescens*, *Scaphiopus holbrookii* (predator abundance relat. to prey survival & injury freq.) 638-644; *Salmo trutta* (prey switching) 918-926; *Aipysurus laevis*, *Boiga irregularis*, *Cacophis squamulosus*, *Demansia psammophis*, *Denisonia punctata*, *Fordonia leucobalia*, *Myron richardsoni*, *Notechis ater*, *Pseudonaja* (*affinis*, *guttata*, *ingrami*, *modesta*, *nuchalis*, *textilis*), *Simoselaps bertholdi*, *Stegonotus cucullatus* (prey constriction) 1067-1071; *Sceloporus undulatus* *garmani* (max. prey size) 1077-1080.

RAINFALL, *Ambystoma talpoideum* (influence of rainfall on migrations) 477-489.

REPRODUCTION, *Menidia menidia* 21-26; *Sternotherus odoratus* (seasonality of changes in testes) 50-56; *Ammocrypta vivax*, *Etheostoma* (*asprigene*, *blennioides*, *caeruleum*, *chlorosomum*, *euzonum*, *flabellare*, *fonticola*, *gracile*, *grahami*, *histrio*, *juliae*, *lepidum*, *nianguae*, *nigrofasciata*, *proeliare*, *punctulatum*, *radiosum*, *spectabile*, *stigmaeum*, *tetrazonum*, *zonale*), *Percina* (*caprodes*, *copelandi*, *cuides*, *macrolepis*, *phoxocephala*, *sciara*, *shumardi*) (reprod. season) 56-68; *Apeltes quadracus*, *Gasterosteus* (*aculeatus*, *wheatlandi*), *Pungitius pungitius* (salinity preference during reprod. season) 209-213; *An-*

olis carolinensis (oviposition interval) 259-262; *Desmognathus ochrophaeus* (cloacal gland secretion & spermatophore formation) 394-402; *Gymnothorax herrei* (spawning) 518-520; *Etheostoma* (*Catonotus*) spp. (nuptial structures) 580-583; *Catostomus commersoni* (non-annual spawning) 613-618; sea turtles (role of hormones in reprod.) 723-735; *Gambusia marshi* 898-905; *Sternotherus odoratus* (female reprod. cycle) 941-949; *Typhlonectes compressicaudus* 950-955; *Poeciliopsis* (*gracilis*, *sphenops*) (photoperiod effect on) 961-965; *Crotaphytus collaris* 976-980; *Poecilia latipinna* (popn. var. in degree of viviparity) 999-1004; *Gambusia gaigei* (fecundity) 1063-1064; *Caretta caretta* (seasonal var. in clutch size) 1083-1085.

SALINITY, *Bufo boreas* (effect of salin. on feeding behav.) 645-648.

SCALES, *Etheostoma* (*Catonotus*) spp. (nuptial structures) 580-583; *Caretta caretta* (use of limbscales in food handling) 786-788.

SEASONALITY, *Sternotherus odoratus* (seasonality of changes in testes) 50-56; *Ammocrypta vivax*, *Etheostoma* (*asprigene*, *blennioides*, *caeruleum*, *chlorosomum*, *euzonum*, *flabellare*, *fonticola*, *gracile*, *grahami*, *histrio*, *juliae*, *lepidum*, *nianguae*, *nigrofasciata*, *proeliare*, *punctulatum*, *radiosum*, *spectabile*, *stigmaeum*, *tetrazonum*, *zonale*), *Percina* (*caprodes*, *copelandi*, *cuides*, *macrolepis*, *phoxocephala*, *sciara*, *shumardi*) (reprod. season) 56-68; *Sphyrna* spp. (seasonal abundance off Florida) 223-225; *Caretta caretta*, *Dermochelys coriacea*, *Lepidochelys kempi* (seasonal abundance in Chesapeake Bay) 449-456; *Crotaphytus collaris* (seasonal hematol. var.) 782-784; *Ichthyomyzon greeleyi* (in growth rates) 881-890; *Gambusia gaigei* (seasonal. of fecundity) 1063-1064; *Caretta caretta* (seasonal var. in clutch size) 1083-1085.

SEX, *Apistogramma* (*borelli*, *caucatoides*), *Pelvicachromis* (*pulcher*, *subocellatus*, *taeniatus*), *Xiphophorus helleri* (effect of pH on sex ratios) 233-235; *Ambystoma laterale-texanum* (unisexual hybrid) 309-324; *Nothobranchius guentheri* (multiple sex chromosome system) 503-508; *Pituophis melanoleucus* (adult & hatchling sex ratios) 649-652; *Chelonia mydas* *agassizi*, *Lepidochelys olivacea* (determining sex of hatchlings) 779-782; *Clemmys insculpta*, *Emydura signata* (non-temp. depend. sex determin.) 784-786; *Ichthyomyzon greeleyi* (changes in sex ratio) 881-890.

SEXUAL DIMORPHISM, *Anolis sagrei* (geogr. var. in sexual dimorph.) 182-194; *Kinosternon hirtipes* (geogr. var. in sexual size dimorph.) 388-393; *Oxyeleus pictus* (behav. modification of sexual dichromatism) 966-975.

SIZE, *Hynobius nebulosus* (cannibal-victim size relationship) 472-476; *Sternotherus odoratus* (egg/body size relat.) 941-949; *Coryphaenoides* (*acrolepis*, *a. armatus*, *armatus variabilis*, *leptolepis*), *Nezumia* (*liolepis*, *stielgidolepis*) (var. in sagitta size with depth)

- 1011–1017; *Taricha torosa* (effect of egg size on larval develop.) 1028–1035; *Scorpaena guttata*, *Sebastes (atrovirens, caurinus, melanostomus, mystinus, japonicus)* (var. in mitochondrial DNA genome size) 1056–1058; *Sceloporus undulatus garmani* (max. prey size) 1077–1080; *Caretta caretta* (seasonal var. in clutch size) 1083–1085.
- SPERMATOOZOA**, *Desmognathus ochrophaeus* 394–402.
- SURVIVAL**, *Rana (pipiens, sylvatica)* (relat. of survival times with pH) 415–423; *Notophthalmus viridescens*, *Scaphiopus holbrooki* (predator abundance relat. to prey survival) 638–644; *Enhydryna schistosa* (using mark & recapture data) 955–961; *Ambystoma texanum*, *Hynobius nebulosus*, *Rana (aurora, catesbeiana, pretiosa, sylvatica)*, *Polypedates leucomystax*, *Triturus vulgaris* (age-specific mortality in larvae) 1080–1083.
- SWIMBLADDER**, *Pangasius sutchi* (used for air-breathing) 994–998.
- SYSTEMATICS**, *Notropis snelsoni* n. sp. (Ouachita Mtn., Arkansas & Oklahoma) 126–134; *Abronia (bogerti, chiszari, deppii, fuscolabialis, graminea, kalaina)* n. sp., *mitchelli, mixtica, oaxacae, reidi, taenata* 135–141; *Nansenia (ardesiaca, problematica)* n. sp. 141–145; *Litoria (citropa, pearsoniana, phyllochroa, piperrata, subglandulosa)* 145–149; *Cryptoblepharus eximius*, *Cyclodina aenea*, *Dactyloperus insulensis*, *Doryura vulpecula*, *Emoa nigrila*, *Gehyra vorax*, *Heteronata pelagica*, *Hombromia (fasciolaris, undosa)*, *Hoplodactylus pomarii*, *Lipinia vulcania*, *Lygosomella aestuosa* (status of type specimens) 150–154; *Notropis* (subgen. *Lythrurus*) (*atrapiacus*, *b. bellus*, *b. alegnotus*, *roseipinnis*) (biochem. systematics) 154–163; *Sibon (carri, f. fischeri, fischeri kidderi)* (review of) 164–174; *Alsodes (barrioi, monticola, nodosus, tumultuosus)*, *Caudiverbera caudiverbera*, *Insuetophrynus acarpicus*, *Telmatobius (halli, marmoratus, montanus, pefauri, peruvianus)* (phenetic relat.) 175–181; *Ioa vigil* (valid sp. of *Percina*) 225–227; *Megachasma pelagios* (relat. of; included in *Cetorhinidae*) 228–231; (creatine kinases variabil.: use in evol. & system. studies of amphib. & rept.) 279–284; *Barbulifer (antennatus, ceuthoecus, mexicanus)* n. sp. [Mexico], *pantherinus* (revision of) 333–339; *Cetopsorhamdia phantasia* n. sp. (Ecuador) 339–344; *Bajacalifornia (arcylepis)* n. sp., *burragei, calcarata, megalops* (rev. of genus; *drakei* & *erimoensis* synonym. of *megalops*) 345–356; *Cheirocerus (abuelo, eques, goeldii)* (gen. revis.; *leptus* synonym. with *goeldii*) 356–367; *Gambusia (yucatanensis, australis)* n. subsp.; *y. yucatanensis*, *elegantissimus, vanzolinii* n. sp.) (review) 565–573; *Etheostoma (Catonotus)* spp. (systematic signif. of nuptial structures) 580–583; *Etmopterus (carteri)* n. sp., *per-ryi* n. sp. [both from off Caribbean Colombia]) 584–591; *Cyrtocara macroleithrum* n. sp. (L. Malawi) 591–596; *Chirostoma beryllinum* (neotype designation) 792–794; *Carpiodes (carpio, cyprinus, velifer)*, *Catostomus (catostomus, commersoni, discobolus, latipinnis)*, *Cycleptus elongatus*, *Erimyzon oblongus*, *Hypentelium nigricans*, *Ictiobus (bubalus, cyprinellus, niger)*, *Minytrema melanops*, *Moxostoma (erythrurum, macrolepidotum)*, *Xyrauchen texanus* (use of larval charc. to examine phylogeny) 833–846; *Etheostoma (nigrum, olmstedii)* (confirmation of species status) 855–865; *Eptatretus mendozai* n. sp. (Puerto Rico) 865–869; *Lophiodes*, *Lophiomus*, *Lophius*, *Sladenia* (intergen. relat.) 870–875; *Atelopus peruensis* n. sp. (Peruvian Andes) 910–917; *Breviraja (claramaculata)* n. sp., *colesi*, *nigriventralis* n. sp., *schroederi* n. sp., *spinosa* (color morphs recognized as distinct species) 1035–1052; *Gambusia (luma, rhizophorae, sexradiata, xanthosoma)* (karyotypes) 1053–1056; *Cheirodon arnoldi* (sr. synonym. of *C. affinis*) 1058–1060; *Serranus lamprurus* (jr. synonym. of *Lutjanus argentiventris*) 1064–1066.
- TEMPERATURE**, *Auxis thazard* (body temp.) 231–233; *Gambusia affinis* (differences in thermal tolerance among acclimation groups) 456–461; *Ambystoma texanum*, *Bufo americanus*, *Pseudacris triseriata*, *Rana sphenoccephala* (ontogenetic shifts in final temp. preferenda) 462–467; *Ambystoma talpoideum* (influence of temp. on migrations) 477–489; *Bufo marinus* (effects of photoperiod & starvation on temp. tolerance) 625–631; sea turtles (thermal regulation) 694–702; reptile eggs (water & heat exchange in) 703–711; *Caretta caretta*, *Chelonia mydas*, *Dermochelys coriacea*, *Lepidochelys olivacea* (temp. depend. sex determ.) 711–722; *Clemmys insculpta*, *Emydra signata* (non-temp. depend. sex determ.) 784–786.
- VARIATION**, *Ammocrypta vivax*, *Etheostoma (aspri-gene, blennioides, caeruleum, chlorosomum, euzonum, flabellare, fonticola, gracile, grahami, histrio, juliae, lepidum, nianguae, nigrofasciata, proeliare, punctulatum, radiosum, spectabile, stigmaeum, tetrazonum, zonale)*, *Percina (caprodes, copelandi, cuides, macrolepidia, phoxoccephala, sciera, shumardi)* (geogr. var. in reprod. season) 56–68; *Goodea atripinnis*, *Chapalichthys encaustus* (microgeogr. biochem. var.) 112–118; *Gambusia affinis*, *Lepomis macrochirus*, *Micropterus salmoides* (microgeogr. isozyme var.) 118–125; *Sibon (carri, fischeri)* (geogr. & non-geogr. var.) 164–174; *Anolis sagrei* (geogr. var. in scale charc. & sex. dimorph.) 182–194; *Salmo apache* (morphol. & meristic var. in popn.) 285–292; *Kinosternon hirtipes* (geogr. var. in sex dimorph.) 388–393; *Gasterosteus aculeatus* (var. of pelvic complex & dorsal spines) 437–444; *Platemys (macrocephala, pallidipectoris, platycephala, radiolata, spixii)* (karyotype var.) 445–449; *Gaster-*

osteus aculeatus (lat. plate var.) 619-624; *Pituophis melanoleucus* (var. in sex ratios of adults & hatchlings) 649-652; *Crotaphytus collaris* (hematol. var.) 782-784; *Chanos chanos* (geogr. var.) 890-898; *Salmo trutta* (individual & temporal var. in prey switching) 918-926; *Poecilia latipinna* (var. in degree of viviparity) 999-1004; *Coryphaenoides (acrolepis, a. armatus, armatus variabilis, leptolepis)*, *Nezumia (liolepis, stelgidolepis)* (var. in sagitta size with depth) 1011-1017; *Scorpaena guttata*, *Sebastes (atrovirens, caurinus, melanostomus, mystinus, japonicus)* (var. in mitochondrial DNA) 1056-1058; *Caretta caretta* (seasonal var. in clutch size) 1083-1085.

VENOM, *Notechis (curtus, scutatus)*, *Acanthophis antarcticus*, *Pseudechis australis*, *Pseudonaja textilis*, *Oxyuranus scutellatus* (antivenom reactivity) 257-259.

VOMERONASAL ORGAN, *Sceloporus jarrovi* (does olfaction activate?) 239-242; *Crotalus viridis viridis* (mouth gaping & head shaking associated with VNO olfaction) 496-497.

WATER, *Anniella pulchra* (drinking of soil water) 981-986.
